Q.) Given $\rightarrow$ $M \uparrow 20\text{mm}$
 M is on VP
 $\alpha = 40^\circ$, $\beta = 45^\circ$ $PO = 100\text{mm}$

Q.) Given

Ans $\rightarrow$ $\theta = 30^\circ$
 $\phi = 32^\circ$

Ans $\rightarrow TL = 61\text{mm}$

$$\theta = 35^\circ$$

$$\phi = 27^\circ$$

Q.) Given $\rightarrow$ A $\uparrow$ 15mm, A is in VP, $\alpha = 40^\circ$, $\beta = 35^\circ$ PD = 60mm

Q.) G

Ans $\rightarrow$ TL = 90mm

$\theta = 35^\circ$

$\phi = 29^\circ$

Q.) Given $\rightarrow$ B is in VP, A 120mm, $\alpha = 45^\circ$, $\theta = 40^\circ$, PD = 60mm

Ans $\rightarrow$ TL = 95mm

$\phi = 25^\circ$

$\beta = 34^\circ$

Q.) Given = FVL = 50mm, TVL = 40mm $\alpha = 90^\circ$, $\beta = 90^\circ$, a is in HP
b is in VP

Q.) Given =

Ans $\rightarrow$ TL = 64mm

$\theta = 51^\circ$

$\phi = 38^\circ$

Q. Given = $A = 15^\circ$, $\alpha = 34^\circ$, $\beta = 35^\circ$, $AB = 42 \text{ mm}$, $\gamma = 40^\circ$, $\beta = 35^\circ$

Ans $\rightarrow TL = 88 \text{ mm}$

$\theta = 34^\circ$

$\phi = 28^\circ$

$\beta = 35^\circ$

Q.) Given = $TL = 75\text{mm}$ $b \uparrow 15\text{mm}$ $b \rightarrow 50\text{mm}$ $\alpha = 90^\circ$ $\beta = 90^\circ$, a is in VP

Ans $\rightarrow \theta = 48^\circ$
 $\phi = 42^\circ$

Q.) Given = PD =

Q.) Given = $PD = 60\text{mm}$, $A \uparrow 25\text{mm}$, $A \rightarrow 45\text{mm}$, $B \uparrow 60\text{mm}$, $B \rightarrow 15\text{mm}$

Ans $\rightarrow TL = 76\text{mm}$

$$\alpha = 30^\circ$$

$$\theta = 27^\circ$$

$$\beta = 27^\circ$$

$$\phi = 23^\circ$$

Q.)

Q.)

Q.)

$$36 \times 4 = 144$$

$R = 60\text{mm}$

$$\theta = \frac{\pi D}{P} = \frac{\pi \times 48}{60}$$

$$\theta = 144^\circ$$

Q.10)

Q.11)

Q.1)

Ellipse by rectangular method.

Q.9)

Q.8)

Parabola by rectangular method.
